Experience

Oct 2024 – Present
Doo Group, Kuala Lumpur
Web Developer Team Lead

- Lead a 10+ engineer cross-functional team, setting technical direction, mentoring, and elevating code quality through structured reviews and standards.
- Drive execution across multiple web initiatives, aligning scope and timelines with business priorities for on-time, high-quality releases.
- Establish and enforce best practices for code review, testing, and CI/CD to improve reliability and maintainability.
- Partner with Product Owners to translate goals into clear roadmaps and prioritized backlogs.
- Architect scalable solutions and unblock complex issues using React, Next.js, Node.js, and Docker.
- Plan and coordinate the full SDLC.

Mar 2023 – Oct 2024
Doo Group, Kuala Lumpur
Senior Web Developer

- Delivered an online academy platform end to end,spanning student, tutor, and admin experiences.
- Introduced Next.js and built a reusable boilerplate to standardize setups and accelerate team onboarding.
- Designed and maintained CI/CD pipelines (build, test, deploy) to streamline releases and strengthen reliability.
- Collaborated with design,product, and QA to define requirements and implement scalable, user centered features.
- Mentored junior developers and led knowledge sharing on modern web practices and tooling.

Sept 2021 – Mar 2023
Mouqy Eyewear, Kuala Lumpur
Full-stack Developer

- Built and maintained the e-commerce storefront for an early-stage eyewear startup using Gatsby + React, WordPress (CMS), and Shopify (catalog, payments).
- Implemented GraphQL integrations and SEO best practices to improve crawlability and performance.
- Created reusable, SEO-focused page templates to accelerate content updates.
- Gathered requirements and translated them into technical solutions from spec to delivery.
- Ensured 24/7 store reliability; triaged incidents and drove root-cause fixes.
- Maintained code readability and maintainability through clean architecture and best practices.

Sept 2021 – Mar 2023

Bitcatcha, Kuala Lumpur

Full-stack Developer

- Maintained and supported a multi-country WordPress site (10 locales), ensuring uptime, performance, and localization quality.
- Troubleshot production issues, upgraded plugins/core safely, and patched vulnerabilities with minimal downtime.
- Implemented new features and UX enhancements; optimized page speed, SEO, and structured data.
- Set up staging and release workflows with version control and deployment checklists to reduce regressions.
- Handled support requests and wrote how-to documentation for non-technical editors

Mar 2020 – Aug 2021

Fehux, Kuala Lumpur

Project Manager

- Led full SDLC for multiple client projects at a software startup, coordinating scope, timelines, and deliverables.
- Ran Scrum ceremonies, monitored progress against milestones, and produced detailed status reports.
- Assessed team performance, provided coaching and training, and removed blockers to maintain velocity.
- Managed four mobile app projects using React Native and Flutter: on-demand delivery, live streaming, e-commerce, and lodging.
- Deployed mobile apps to the Apple App Store and Google Play Store.
- Deployed backend systems and web apps using Docker and cloud services.
- Provided responsive client service and requirements clarification to align outcomes with expectations.
